## STOCK MARKET CONTINUES DULI

Suspension of Another Brokerag Firm Announced.

WERE SHORT ON COTTON MARKE

The Only Notable Movements Durin the Day Were the Advance in Sugar Stocks and in Burlington-Local and Tobacco Markets.

NEW YORK, May 28.—The opening of the new week showed no material change in speculative conditions, and the stock markets of New York, London, Paris and Berlin continued dull and neglected. In New York another brokerage firm announced its suspension, the failure being announced, as was that of Price, McCormick & Co., on the Cotton and Stock Exchanges almost simultaneously. The closing out of the firm's contracts on the Stock Exchange, under the rule, resulted in transactions in about 10,000 shares. That prices were inclined to advance under the influence of the settlement was sufficiently explained by the fact that the buying of stocks for the firm outnumbered the selling fully 3 to 1. That is to say, the house was largely short of the market.

The fallure is attributed to cotton speculation, as the recent movement of stocks has been in favor of outstanding contracts of the firm.

Last week's rumors of financial difficulties, which specified this house, brought pressure to bear upon them and precipitated the assignment. The fact that the same kind of rumors are circulated regarding some other houses is a factor in keeping Wall-Sirect sentiment unsettled.

The only notable movements furing the day were the advances in Sugar, sunposed to be on bear covering, and in Burlington on a resumption of buying of the same character as that which has given the stock its recent strength. These advances prompted some sharp raises at other points in the market, and some of the earlier losses were recovered. The market was semi-stagmant at times, and the closing was dull and irregilar.

London sold small amounts of stock, almough that market, as a whole, showed some strength on the advance of the British into the Transyaal war on the effect to be produced in the money market by the resumption of the gold supply from the South African mines, but at the present time there is a reflux of cash into the reserves of all the great banks of the world, and increasing difficulty is due to a deeline in trade.

Dulliness to-day was accentu NEW YORK, May 28.-The opening of

COTTON MARKETS.

NEW YORK, May 28.—COTTON—Cables from Liverpool cotton market, reporting a net advance of 1 to 3 points on futures and a hardening tendency on spot cotton, made a much better showing than had been looked for, and our market opened 3 to 17 points higher, the latter advance being in May. Trading on the call was active, and so it continued for some time, chiefly in foreign buying and local covering. Then the failure of Seymour, Johnston & Co, was announced, and the market immediately broke 5 points, only to rally again, however, as most of the accounts with that house had been protected. Later in the session trading became less active, and prices worked within a comparatively narrow scope, with the general tendency, if anything, a little downward, as the late English cables showed a falling off from the opening. Favorable crop accounts were also received, and there was some asposition to sell on the unsatisfactory reports from the cloth market. Manchester reported an entire lack of business with India, owing to the spread of famine in that country. Towards the close there was a sharp decline under a flurry or general selling, with the market finally barely steady, I point higher to id. flurry of general selling, with the market finally barely steady, I point higher to A

#### SOCIAL AND PERSONAL.

Yesterday afternoon was a delightful one at the Woman's Club. "Spain" was the subjet, and Mr. Henry T. Anderson,

one at the Woman's Club. "Spain" was the subjet, and Mr. Henry T. Anderson, of this city, read a most interesting sketch of Spanish history, in which he pointed out the influences that contributed to the development of Spanish civilization and some of the causes which led to the decay of that civilization at a time when other European States were entering upon the most brilliant period of their history. "The student of history," said Mr. Anderson, "must be impressed with the difference in element and in form between the civilization of Western Europe and that of the States which have preceded it. In the earlier civilizations of the East, whether of Egypt and India or Greece and Rome, the Institutions of any particular era have been dominated by one controlling idea or principle to the exclusion of all others. Thus the civilizations of Egypt and of India have been dominated by the theocratic principle. In other instances, as in Athens, the democratic principle has controlled, and we have had examples of the purest democracy which the world has ever known. The Roman Empire bequeathed to modern civilization two of its most important elements—the town or borough—with its municipal government, from which has sprung the great principle of democracy, and the reverence for imperial power, from which has developed the principle of monarchy. The barbarian has brought into modern civilization the two great principles of individual liberty and millitary cilentiship, or the love of the warrior for his chief, out of which developed the feudal system and the aristocratic organization of European governments. In the Christian Church, as an ecclesiastical organization, modern civilization has found a force which has constantly struggled, and often with success, for the establishment of the principles of theocracy."

"In the development of European civilization you will see the truth of the propo-

success, for the establishment of the principles of theoracy."

'In the development of European civilization you will see the truth of the proposition which I have endeavored to establish, that the development of that civilization has been a result of the contest between the different principles in which no one has obtained exclusive control—in which each has been modified and restrained by the other, and that in this contest between these important elements lies the strength and protection of modern institutions and the protection of the liberty of the people."

In speaking of the Spanish Arab, Mr.

In speaking of the Spanish Arao, Mf. Anderson said he was distinguished for his enlightenment. That in the treatment of Hebrew and Christian the rule of the Califs of Cardona and Grenada might furnish examples of justice and moderation worthy of the limitation by Christian States. But the kingdom of the Moors in Spain was destined to an early decay because it was dominated by theocratic principles, to the exclusion of all others. The refgn of Frederick and Isabelia, the most brilliant period of Spanish history, the speaker said, witnessed the final overthe speaker said, witnessed the final over-throw of Moorish power, but it was also in this reign that the forces were estab-lished which led to the downfall of Span-ish power and the decay of Spanish civili-zation. The long war with the Saracens cultivated in the mind of the Spanish peocultivated in the mind of the Spanish peo-ple a strong religious fervor, and in the reign of Ferdinand and Isabella the power of the Church was advanced until the theocratic principle absolutely dominated the Spanish government. Out of this re-ligious intolerance was the establishment of the Spanish inquisition, the most po-tent factor in the decay of Spanish civiliration. The expulsion of the Jews an the banishment of the Moors was disa-trous upon the industrial interests an almost totally destroyed the agricultural and commercial interests. Mr. Anderson and commercial interests, Mr. Anderson ended his talk in a magnificent peroration, and said, "Above all and over all, if liberty, with all of its blessings, is to be preserved, the human mind must be free to search for the truth, and to apply its principles to the problems of individual, civil and religious life."

After this address Mr. Harry W. Geiger delighted the audience with several selections by Spanish composers. Miss Bell, who was to have performed, was una-

voidably absent.

Miss Sue Wellford and Miss Maragaret Miss Sue Wellord and Miss Maragaret Stringfellow were chairmen, and their guests were Miss Elizabeth Davenport, Miss Maria Williams, Miss Stringfellow, Mrs. Werth, Mrs. Stringfellow and Mr. B. B. Munford. Mrs. John Hunter served tea, and was

assisted by Mrs. Christopher Tompkins, Mrs. William Parrish, Mrs. W. F. War-ren and Miss Emily Glasgow.

The Girls' Club, which was opened last evening with the most pleasing exercises, is one of the organizations which is calculated to do more good and give more

pleasure than is easily reckoned.

The exercises last evening were most attractive and greatly appreciated by the large audience present. Rev. M. Ashby Jones offered a prayer, and Mr. George Bryan gave a graceful little talk. The musical programme was as follows:

Ouartette "Believe Me of All Those Franchisconers and the programme of the progra Quartette, "Believe Me of All Those Endearing Young Charms," Miss Meade, Mrs Cadot, Messrs. Warren and Watkins; Solo, "Good Bye," Tosti, Mrs George Warren; Duet, Selected, Mrs. Cadot and Miss Meade; Plano Selection, Miss Terry; Solo, Selected, Long, Miss Marianne Meade; Ballade, Chopin, Miss Maria Williams; Duet Mrs. Cadot and Miss Meade; Violin Duet, Mrs. Cadot, and Miss Meade; Violin Solo; Solo, M'ss Mamle Harrison; Violin Solo; Quartette, "Sweet and Low," Mrs. Cadot, Miss Meade, Messrs. Warren and Watkins.

From to-day on the room will be opened daily from 5:30 in the afternoon to 9:45 at night. Books may be carried home and kept for two weeks. This club was orga-
